

SATELLITE EUTELSAT 7C

EXPANDING BROADCAST RESOURCES IN AFRICA, MIDDLE EAST & TURKEY

Ku-band West Downlink Coverage

Ku-band East Downlink Coverage

EUTELSAT 7C is a high-power broadcast satellite for markets in Africa, Europe and the Middle East. It is co-positioned with EUTELSAT 7B at 7° East.

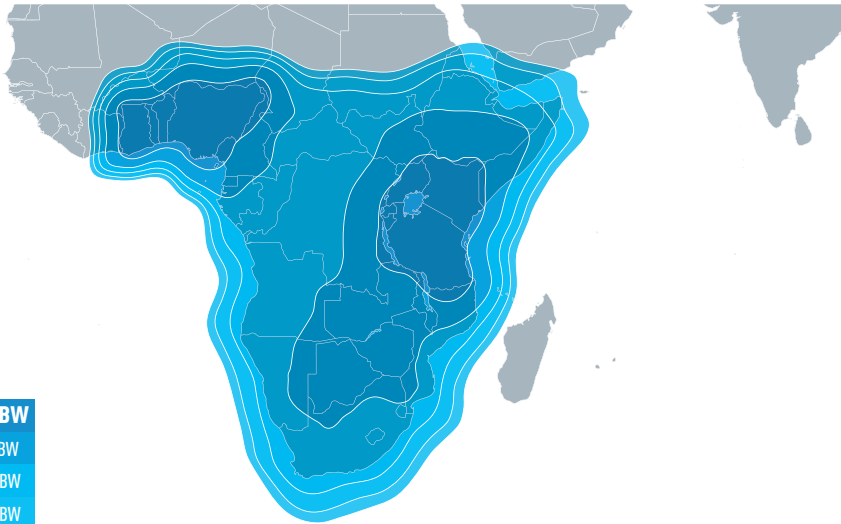

This two-satellite constellation with enhanced coverage flexibility and connectivity takes the 7° East neighbourhood to a high level.

By significantly increasing capacity over Sub-Saharan Africa, EUTELSAT 7C reaches over 3 million homes and can accommodate several hundred additional digital channels, to support the region's fast expanding TV market.

It is also equipped with a beam providing enhanced capacity for government services over Europe, the Middle East and Central Asia, as well as a steerable beam that can cover any region visible from 7° East.

Manufactured by Maxar Technologies, and launched in 2019, EUTELSAT 7C is equipped with 49 36 MHz-equivalent Ku-band transponders.
